

IR+M's 1-3 Year Strategy utilizes the firm's deep investment team and experience as bottom-up security selectors to aim to add value over the Index. The Strategy seeks to improve traditional short returns by adding sector diversification as the short end of the yield curve presents opportunities in both credit and securitized sectors. Principal protection is paramount and we invest in high-quality, US dollar-denominated bonds. Our focus on quality, combined with the short-duration nature of the Strategy, results in self-liquidating portfolios that generate consistent cash flows.

PORTFOLIO CONSTRUCTION

- Duration neutral to benchmark
- Focus on high-quality spread product
- Capitalize on our strengths: experience and security selection
- Take what the market gives you
 - Introduce incremental risk to portfolios when compensation is attractive; reduce risk when spreads are narrow
 - Emphasize undervalued sectors
 - Seek securities with embedded, often over-looked value
 - Invest in markets that offer structural and price advantages

5-Year Historical Characteristics Relative to Index

Sources: Bloomberg and IR+M Analytics
 All data as of 6/30/23. Representative portfolio characteristics. Some statistics require assumptions for calculations which can be disclosed upon request. A similar analysis can be provided for any portfolio we manage. Yields are represented as of the above date and are subject to change. Totals may not sum to 100 due to rounding. The blue bars show the 5-year historical range and the orange diamond represents the value as of 6/30/23. Ratings (Moody's) shows the number of rating notch differences between the portfolio and index. Moody's ratings shown are calculated using average quality. The relative gov't-backed weighting is the aggregate weighting for Treasuries, Agency, Govt Guaranteed, Agency RMBS and Agency CMBS versus the benchmark weighting for those sectors.
